

Our action

Connecting communities and fostering the world of tomorrow.

Our mission

In designing, building and maintaining sustainable transport infrastructure, we combine our local roots with the experience from around the world.

Our ambition

Being the world leader in innovative, sustainable mobility solutions.

Our values

We open the way by caring, by sharing, by daring

2022 key figures

Nearly 58,000 employees in 50 countries on 5 continents

€15.5 billion in revenue Nearly / 60,000 projects / 900 local business units / 3,000 materials production and recycling units

ACT

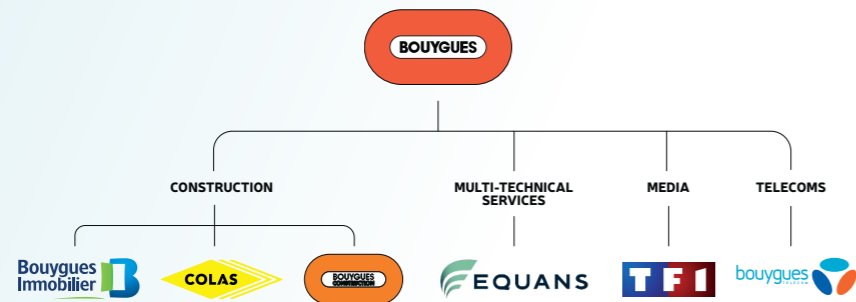

Colas acts and commits to respond to the expectations and needs of its customers, employees, partners, users, investors and, generally speaking, civil society as a whole.

For the planet

Colas develops low carbon techniques and solutions, rolls out actions to reduce the carbon intensity of its direct emissions, and preserves biodiversity on its sites.

Locally

We are partners in sustainable development for local communities. Colas builds transport infrastructures that meet users' expectations and boost economic and social development for communities around the world.

- 12 quarries
- 12 packaging plants + ASTECH polymer modified asphalt plant
- 14 laboratories
- 1 Medialine orientation marking plant

COLAS

World leader in construction and maintenance of transport infrastructure

FUTURE MOBILITY DEVELOPMENT CENTER BMW GROUP IN SOKOLOV, CZECH REPUBLIC

Client:
BMW Group

Contractor:
COLAS CZ, a.s., COLAS Projects

Construction period:
2020–2023

For BMW, we have built various types of roads and asphalt pavements which can be found in various countries and on several continents. The project included a large volume of earthworks, road sections of various types and pavements, bridges, drainage, electrical distribution and installation of terminal equipment, fencing, as well as a migration tunnel for amphibians.

TRAM LINE OHRADA – PALMOVKA IN PRAGUE

Client:
Dopravní podnik hl.m. Prahy

Contractor:
COLAS CZ, a.s., FIRESTA-Fišer

Construction period:
2022–2023

Rehabilitation of the tram track between Ohrada and Palmovka. We laid 1246 meters of new tracks on the tram bridge to ensure a quieter and safer ride. We also refurbished the entire bridge itself and reconstructed the Krejčířek tram stop.

ŽĎÁKOVSKÝ BRIDGE

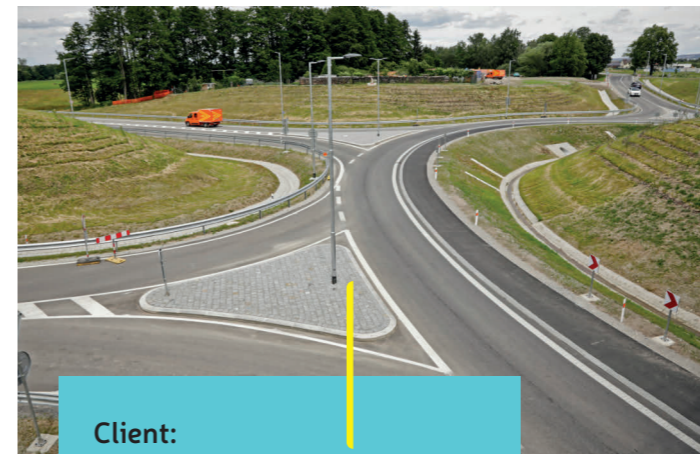

Client:
Jihočeský kraj

Contractor:
COLAS CZ, a.s.

Construction period:
2015–2017

Refurbishment of a single-arch steel road bridge built in 1967 over the Vltava River at the Orlik Dam. We performed repair works on the entire bridge superstructure, including replacement of expansion joints, renovation of the paint on steel structures and rehabilitation of concrete structures.

Client:
Jihočeský kraj

Contractor:
COLAS CZ, a.s., FIRESTA-Fišer

Construction period:
2021–2023

SOUTHERN ARTERIAL ROAD ČESKÉ BUDĚJOVICE

In the southern suburb of České Budějovice, we have completed a three-kilometer long arterial road that will serve as a link to the D3 motorway. Six bridges (including three railway bridges), two large roundabouts, and footbridges for cyclists and pedestrians were built along the route.

TERTIARY LINE IN THE ČÍSAŘSKÝ QUARRY

Construction period:
2022–2023

In our quarry in northern Bohemia, we have built a new tertiary processing line for basalt which we mine here. The investment of almost 100 million CZK will reduce dust and noise pollution, and thus contribute to environmental protection.
